PREFACE

Acknowledgement is given to the Office of Agricultural Development, South Dakota Department of State Development for funding this issue of South Dakota Agricultural Statistics.

This bulletin presents state and county crop data, state price and income data for 1984-85, and state livestock data for January 1, 1980-86. Some United States data is shown for comparative purposes. For earlier year's county crop data refer to South Dakota Historic Estimates 1970-75, 1976-80 and South Dakota Agricultural Statistics 1979-85.

All current data in this bulletin is preliminary and subject to revision the following year and also after review of the United States Census data each five years.

Acknowledgement is given to the many South Dakota farmers, ranchers, and merchants as well as numerous commercial, educational, and government agencies who have voluntarily contributed basic information used in compilation of these data. Preparation of this publication was done by the staff of the South Dakota Agricultural Statistics Service.

Cover Photo: The cover photograph is from the South Dakota Department of State Development.

TABLE OF CONTENTS

GENERAL INFORMATION

Pages

Preface 1

Table of Contents 2

Crop Production - Rank by State, 1985 3

Livestock - Rank by State, January 1, 1986 and December 1, 1985 3

Cash Receipts and Government Payments - Rank by State, 1984 3

Crop Production - Rank by County, 1985 4

Crop and Livestock Record Highs and Lows 5

Pages

What a Dollar Spent on Food Paid for in 1985 6

Principal Crops Yield Per Acre Chart, 1950-85 6

Number, Average Size and Land in Farms, 1960-85 7

Number of Livestock Farms, 1980-85 7

Weather - Crop Summary Narrative, 1985 8

Precipitation Maps, 1985 and Normal Growing Seasons 9

Autumn and Spring Freeze Hazard Maps 10

CROPS

Crop Production Narrative, S.D. and U.S., 1985 11

Planted Acres, Harvested Acres, Yield and Production, S.D. and U.S., 1984-85 12

County Estimates - Corn, Grain and Silage, 1984-85 13

Corn Production by County Map, 1985 15

County Estimates - Corn for Grain, Dryland and Irrigated, 1984-85 16

County Estimates - Oats, 1984-85 18

Oats Production by County Map, 1985 19

County Estimates - Barley, 1984-85 20

Barley Production by County Map, 1985 21

County Estimates - Rye, 1984-85 22

Rye Production by County Map, 1985 23

County Estimates - Flaxseed, 1984-85 24

Flaxseed Production by County Map, 1985 25

County Estimates - Soybeans, 1984-85 26

Soybeans Production by County Map, 1985 27

County Estimates - Sorghum, 1984-85 28

Grain Sorghum Production by County Map, 1985 29

County Estimates - All Sunflower, 1984-85 30

All Sunflower Production by County Map, 1985 31

County Estimates - All Wheat, 1984-85 32

All Wheat Production by County Map, 1985 33

County Estimates - Winter Wheat, 1984-85 34

County Estimates - Winter Wheat Growing Practices, 1984-85 35

County Estimates - Durum Wheat, 1984-85 37

County Estimates - Other Spring Wheat, 1984-85 38

County Estimates - Other Spring Wheat Growing Practices, 1984-85 39

Barley Varieties - Acres and Percent by Variety, 1980-85 41

Barley Varieties - Percent Acres Seeded by Variety, by District, 1985 41

Grain Stocks by Quarter - Small Grains and Flaxseed, 1982-86 42

Grain Stocks by Quarter - Corn, Sorghum and Soybeans, 1982-86 43

Commercial Fertilizer Sold, 1971-85 44

Commercial Fertilizer - 15 Leading Fertilizers, 1984-85 44

LIVESTOCK AND POULTRY

Livestock and Poultry Narrative, S.D. and U.S., 1985 45

Cattle Inventory Numbers, 1980-86 46

Cattle and Calves - Production, Disposition and Income, 1980-85 46

Cattle Inventory Numbers, United States, 1980-86 47

Cattle and Calves - Production, Disposition and Income, United States, 1980-85 47

Cattle and Calves on Feed, 1980-86 48

Cattle and Calves - Marketings and Placements, 1982-85 48

Cattle Slaughter by Month, 1980-85 48

Sows Farrowed, Pigs Per Litter and Pig Crop, 1980-85 49

Hog Slaughter by Month, 1980-85 49

Hog Inventory Numbers, 1980-85 50

Hogs - Production, Disposition and Income, 1980-85 50

Hog Inventory Numbers, United States, 1980-85 51

Hogs - Production, Disposition and Income, United States, 1980-85 51

Sheep Inventory Numbers, January 1, 1980-86 52

Sheep and Lambs - Production, Disposition and Income, 1980-85 52

Sheep Inventory Numbers, United States, January 1, 1980-86 53

Sheep and Lambs - Production, Disposition and Income, United States, 1980-85 53

Wool - Sheep Shorn, Wool Production and Value, 1980-85 54

Sheep and Lamb Slaughter by Month, 1980-85 54

Chicken Inventory Numbers, December 1, 1980-85 55

Production and Disposition of Chickens, 1980-85 55

Egg Production by Quarter, 1980-85 55

Production and Disposition of Eggs, 1980-85 55

Production and Disposition of Turkeys, 1980-85 55

Milk and Milkfat Production and Milk Utilization, 1980-85 56

Milk Production by Quarter, 1980-85 56

Manufactured Dairy Products, 1980-85 56

PRICES AND INCOME

Income and Prices Narrative, S.D. and U.S., 1985 57

Cash Receipts and Government Payments, 1982-84 58

Cash Receipts by Month and Percent Distribution, 1985 59

Total Cash Receipts, Government Payments and Total Income, 1982-84 59

Farm Production Expenses, 1982-84 59

Value of Home Consumption, 1983-84 59

Cash Receipts Charts, 1980-84 Average and 1984 60

Farm Production Expenses Charts, 1980-84 Average and 1984 61

Price and Value of Production - Principal Crops, S.D. and U.S., 1984-85 62

Prices Received - Crops, Monthly Average, 1984-85 62

Prices Received Charts - All Wheat, Corn, Oats and Barley 63

Prices Received Charts - Flaxseed, Soybeans, Alfalfa Hay and Other Hay 64

Value of Production Per Harvested Acre, 1967-85 65

Prices Received - Livestock Monthly and Annual Average, 1984-85 65

Prices Received Charts - Steers and Heifers, Calves, Cows and Hogs 66

Prices Received Charts - Sheep, Lambs and Wool 67

Farm Real Estate - Value, Debts and Taxes, 1976-85 68

Cash Rents - Farm, Pasture and Cropland, 1976-85 68

South Dakota

1985 WEATHER-CROP SUMMARY

General

South Dakota's 1985 weather started with below normal temperatures, and above normal precipitation south but below normal precipitation north in January. February continued with below normal temperatures for the first half but warmed nicely during the last half. Temperatures remained well above normal during March, although a major snow storm hit early in the month. Spring planting had begun by the end of March and was well underway by the first of April. May brought continued warm, dry weather and small grain seeding was complete early in the month. The warm, dry weather hurt pastures and hay fields in the western part of the State. By the end of June, most planting was completed. Crop prospects in the west were in near failure condition due to the dry conditions. Small grain harvest and row crop development were ahead of normal pace for most crops by July. By the time August arrived, small grain harvest was virtually complete but cool, damp weather hindered row crop development. Above normal precipitation and below normal temperatures were the rule for September, with frost and snowfall hitting at the end of the month. Row crop harvest finally got underway at the end of October, but by the end of November over 30% of the corn crop remained in the field. Snow began to fall early in the month and slowed harvest to a near standstill. Corn harvest continued during December when and where possible.

January

January brought below normal temperatures, with light snowfall. Precipitation was above normal south but below normal north with snow cover of 1 to 3 inches across the State at the end of the month.

February

Temperatures continued below normal during the first half of February, but moved above normal during the last half. Total yearly precipitation ranged from over 2 inches above normal in the northeast to 1 inch below normal in the southeast.

March

Temperatures averaged well above normal throughout most of March. Precipitation was light during most of the month, except for a major storm that hit in early March, and dumped 10 to 20 inches of snow over the State. Some early spring planting began during the last week of the month.

April

Spring planting was well underway by the first of April. Temperatures remained above normal throughout the month. Soil moisture ranged from surplus to adequate in the east to short and critically short in the west.

May

Small grain seeding was virtually complete by the first week of May. Temperatures remained above normal. Precipitation was generally light across the State, with much of the western two-thirds receiving little to no rain. The eastern one-third of the State continued to have adequate to surplus moisture, while the west became drier. The warm, dry weather was hard on pastures and hay fields. Cattle were turned onto hay fields as pastures dried up.

June

All planting was virtually complete by month's end. Dry conditions continued to plague most of the western two-thirds of the State, causing crop prospects to reach very poor to near failure conditions across much of the area. Temperatures were mostly below normal, slowing small grain development. Precipitation remained below normal throughout June.

July

Warm, mostly dry weather during July helped push small grain harvest and row crop development ahead of normal pace for most crops. Soil moisture remained critically short across the western one-fourth, adequate across the eastern one-fourth, and short over the remaining central part of the State. All of the counties in the western two-thirds of the State applied for drought disaster relief.

August

Harvest of all small grains except spring wheat and flaxseed were complete by mid-August. Temperatures averaged mostly below normal during the month. The cool, damp weather slowed small grain harvest and row crop development. All row crops were behind their normal maturity progress at the end of August. Winter grains were beginning to be seeded.

September

Frost occurred over much of the State the last week of September, causing some damage to late planted crops. Temperatures ranged from 8 degrees above to 18 degrees below normal during the month. Above normal precipitation fell during September, with snow falling at the end of the month. Row crop development continued behind normal.

October

Harvest was finally well underway during the last week of October, although well behind normal. Warm, windy weather helped crop dry down. Temperatures averaged below normal for the first half of the month and above normal for the second half. Precipitation was generally widespread but light.

November

Harvest continued slowly during the month but was well behind normal pace. Sorghum and soybean harvest continued but the high moisture content of corn slowed its harvest as producers hoped the crop would dry naturally. Snow began to fall during the second week of November and continued through the month, thus hampering harvest. Snow depths ranged from 2 to 27 inches by the end of the month. By the end of November, less than 70% of the corn crop was harvested, but harvest of all other crops was virtually complete.

December

Corn harvest continued when and where possible. Most of the month, dry weather prevailed, and by the end of December snow depths ranged from 1 to 8 inches. Average temperatures ranged from 15 degrees below to 12 degrees above normal. Snow cover on winter wheat fields were good during the coldest periods.

1985 CROP PRODUCTION

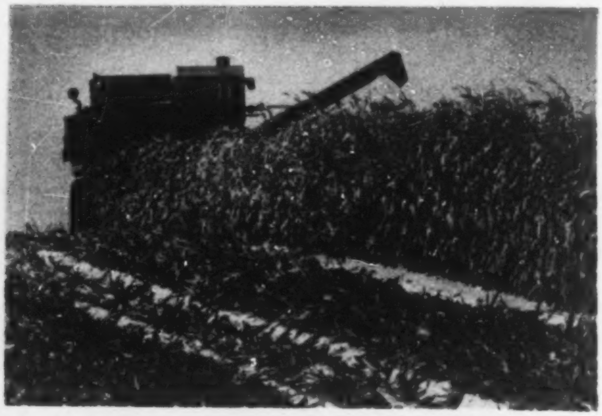

Photo courtesy of Sioux Falls Argus Leader

SOUTH DAKOTA

Summer drought in the western two-thirds of the state reduced production levels of all crops in the area. However, adequate moisture in the eastern one-third helped offset the drought to produce record yields and/or production totals for several crops. Corn, soybeans, barley, spring wheat, and potatoes all showed production increases from a year earlier. Corn for grain production set a new record high and increased 35% from the 1984 crop. Soybean production was a record 40.6 million bushels up 30% from the previous record high set in 1984. This is the fourth consecutive year a new record high soybean production has been reached. Barley production reached the highest level since 1948, up 7% from the 1984 crop. Other spring wheat production set a new record high, 5% above the previous year's output. The winter wheat crop production dropped 28% from 1984's record high level, and durum wheat production was down 16% from the previous year. The large decrease in winter and durum wheat productions helped offset the record other spring wheat production so that all wheat production was down 12% from the record high level in 1984. Oats production decreased 8% from 1984. Rye production fell 59% from the previous year, while flaxseed production fell 11%. Sorghum for grain and sunflower production decreased 19% and 4% respectively. All hay production was at the lowest level since 1976 at 4,830,000 tons, down 40% from the previous year's near record.

Crop yields were down for all small grains except oats, while row crop yields were mostly up and several record highs were reached. Corn for grain increased to 84 bushels per acre, 10 bushels higher than the previous record set in 1979. Soybean yield, at 32 bushels, was up 9 bushels from the previous year, and the highest yield recorded since 1979. Flaxseed also recorded a record high yield of 15 bushels per acre. Sunflower seed yield rose to the second highest level recorded, at 1,220 pounds per acre. Sorghum for grain was the only row crop that recorded a lower yield from the previous year, at 40 bushels per acre, down 7 bushels. The oat yield at 56 bushels per acre was the only small grain that did not decrease, but remained at the same level as the 1984 crop. Other spring and durum wheat yields dropped 3 bushels each to 30 and 31 bushels, respectively, while winter wheat decreased 7 bushels, to 29 bushels per acre. The barley yield, at 45 bushels was down 6 bushels from 1984's record yield

Planted acres of principal crops grown in South Dakota totaled 16.1 million acres in 1985, 3% less than the acreage planted in 1984. All wheat seedings increased 175,000 acres to 4,170,000 acres. Winter wheat acreage decreased to 1.85 million acres while durum wheat decreased to 90,000 acres. Other spring wheat increased to 2.23 million. All corn plantings increased 110,000 acres to 3.51 million acres in 1985. Oats planted acres increased 200,000 acres; barley increased to 780,000 acres; rye acreage fell to a record low 130,000 acres; soybean planted acres fell 120,000 from the 1984 record 1.4 million acres.

Harvested acres of major crops totaled nearly 15.4 million acres, 6% below 1984's acreage. Corn, sorghum, other spring wheat, and barley were the only crops that had increased harvested acres.

UNITED STATES

January weather was characterized by snow and bitter cold temperatures. Wet, cold conditions considerably slowed land preparation in the Southeast. The excessively cold temperatures continued the first half of February, but temperatures climbed above normal the second half of the month. Wet weather slowed land preparation and seeding throughout the Corn Belt, much of the Delta, and down into Texas the first half of March. Excessive moisture delayed land preparation and seeding throughout the Corn Belt during most of April. Land preparation progressed well in the Southeast but dryness slowed planting and prevented seeds from germinating. Rain slowed fieldwork in early May across much of the Corn Belt. By month's end, seeding and crop development had outpaced both last year and the average in most areas. Hot, dry weather spread over the Corn Belt, the Delta, and throughout the Southeast the first week of June. Topsoil moisture was mostly inadequate across the Nation during the month of July. However, timely rains kept crops in fairly good condition throughout the month and provided enough moisture to further crop development. The western States were extremely dry from the beginning of July until the end. Moisture and warmth pushed crop development ahead of normal the first half of August, but at mid-month below normal temperatures began slowing crop development in the Great Plains. September was characterized by below normal temperatures, slow crop development and maturity. Crop progress went from mostly ahead of normal in August to mostly behind normal during September. Snow and freezing temperatures appeared early in 1985, virtually ending the growing season over the central and northern Great Plains, the last week of September. Much needed, but unwanted moisture delayed crop harvest during most of October. Early in the month snow and rain over the eastern two-thirds of the Nation was responsible for delaying harvest. Open weather around mid-month allowed harvest to progress rapidly in the northern Great Plains, portions of the Corn Belt, and in the Southeast. Cold, wintery weather, rain and earlier than normal snowfall in November prolonged fall row crop harvest. Dry weather aided crop harvest through the Great Plains, across the Corn Belt and in parts of the Southeast the first week of November. Harvest delays were common the rest of November. Crop harvesting progress for most crops began the month behind schedule and remained behind schedule during the entire month. Rainy, snowy weather hampered harvest progress for the most part during December. However, open weather and frozen soil advanced harvest late in the month.

Area of principal crops planted or grown in 1985 totaled 342 million acres, down 3 million acres from 1984, but up 33 million acres from 1983 when acreage was sharply reduced by government programs. Soybeans showed the largest acreage decrease at 5 million acres and was followed by all wheat with a 4 million acre decrease from last year. These acreage reductions were partially offset by an increase of 3 million acres in corn and 1 million acres each in barley, sorghum and oats. Harvested area of principal crops totaled 331 million acres, down 5 million acres from 1984, but up 37 million acres from 1983.

COMMERCIAL FERTILIZER

Commercial fertilizer sales in South Dakota decreased 6 percent in the fiscal year ending June 30,1985. There were 391,187 tons (including carrier) of commercial fertilizer sold in fiscal year 1985. Actual nutrients (NPK) totaled 194,640 tons, down 8 percent.

Nitrogen accounted for 64 percent of the total NPK. Phosphoric acid accounted for 29 percent and potash accounted for 7 percent.

The fertilizer 18-46-0 continued to be the most widely used analysis in fiscal year 1985 with 83,344 tons. The second most popular analysis used was 10-34-0 with 10,437 tons. These two fertilizers accounted for 24 percent of all fertilizer used in South Dakota during fiscal year 1985.

LIVESTOCK AND POULTRY

SOUTH DAKOTA

Livestock and Poultry

Livestock and poultry cash receipts in 1985 totaled $1,782 million, down 1% from the previous year. Cash receipts from all cattle, hogs, and sheep during 1985 were $1,638 million, up 6% from 1984.

Cattle

The State's inventory of all cattle and calves on January 1, 1986 was estimated at 3,600,000 head, the lowest number on this date since 1962. This is 13% less than the January 1, 1985 inventory. The 1985 calf crop was estimated at 1,690,000 head, down 6% from 1984 and 1983 calf crops. Average value per head of all cattle on January 1, 1986 was $385, down $15 from January 1, 1985. Cash receipts from sales of cattle and calves in 1985, at $1,327 million, were 10% above last year.

Hogs

The number of hogs and pigs on farms in the State on December 1, 1985, at 1,610,000 head, was 1% above a year earlier. The average value of all hogs and pigs was $66.00 per head compared to $77.00 a year ago. The total value of hogs and pigs on December 1 was $106 million, down 14% from a year earlier. Cash receipts from marketings of hogs and pigs in 1985 were $270 million, down 10% from 1984. The pig crop for 1985 was 2,695,000, up 5% from 1984. There was an increase of 7% in the spring pig crop and an increase of 3% in the fall pig crop.

Sheep

The number of sheep and lambs on South Dakota farms and ranches on January 1, 1986, at 540,000, was 15% below the January 1, 1985 level and the lowest level since these records began in 1920. Stock sheep numbered 460,000, down 18% from 1985 but sheep on feed increased 7% to 80,000 head. The 1985 lamb crop, at 550,000 head, was down 10% from 1984. Stock sheep inventory is the lowest ever recorded and 1985 lamb crop is the lowest since 1950. Average value per head of all sheep on January 1, 1986, was $60.00 compared to $53.00 on January 1, 1985. Cash receipts from sales of sheep and lambs during the year totaled $41 million, up 14% from a year earlier. Sheep and lambs shorn during 1985, totaled 656,000 head, a decrease of 11%. Average fleece weight of shorn wool was 8.5 pounds per head, down 0.1 pound from 1984.

Milk Production

South Dakota milk production in 1985 totaled 1,794 million pounds, up 8% from 1984. The average number of milk cows remain unchanged from 1984, but the production per cow increased 784 pounds in 1985. There were 5,600 operations in the State with milk cows in 1985, down 7% from 1984.

Poultry and Eggs

The number of chickens on farms on December 1, 1985 was 1,950,000, an increase of 1% from a year earlier. Egg production in 1985 was 391 million eggs, up 3% from 1984. The average number of layers for 1985 at 1,590,000, was down 2% from the previous year. The number of turkeys raised in South Dakota in 1985 was 1,723,000, an increase of 13% from 1984.

UNITED STATES

Cattle

The Nation's farmers and ranchers had 105 million cattle and calves in their herds on January 1, 1986, down 4% from the 110 million on hand a year earlier. This continues the recent downward trend in cattle inventories for the fourth consecutive year and was the lowest number on hand since 1963. The number of beef cows decreased 5% below January 1, 1985 and the lowest since 1966. The number of milk cows are 3% above January 1, 1985 and at the highest level since 1975. The value of cattle and calves on farms and ranches January 1, 1986, amounted to $41.3 billion, a decrease of 6% from a year ago. The 1985 calf crop is estimated at 41.0 million, down 3% from 1984 and is the lowest since 1961. Milk production during 1985 totaled a record high 144 billion pounds, 3% above the previous record high set in 1983. The annual average number of cows is 11.0 million head, 2% above the 1984 average of 10.8 million head.

Hogs

Hog and pig numbers in the Nation on December 1, 1985, at 52 million head, were down 3% from a year ago. The average value per head was $69.60 compared to $75.00 on December 1, 1984. Total value of all hogs and pigs on hand December 1, 1985, were $3.6 billion, a decrease of 10% from a year earlier. The 1985 pig crop totaled 86.0 million head, 1% below 1984.

Sheep

Sheep and lamb numbers in the United States on January 1, 1986, totaled 9.93 million head, down 5% from a year earlier. Stock sheep inventory dropped to a record low 8.44 million head on January 1, 1986, down 5% from the previous record low count of last year. The average value per head of all sheep and lambs increased $6.30 from last year to $67.40 per head on January 1, 1986, resulting in a total value of $670 million. The 1985 lamb crop of 7.4 million head declined 5% from the 1984 lamb crop.

Poultry and Eggs

Chicken numbers on December 1, 1985, totaled 368 million, down 2% from a year earlier. Layer numbers during 1985 averaged 277 million compared with 278 million during 1984. Egg production in 1985 was 68.4 billion eggs, about the same as 1984 production. Turkeys raised in the United States during 1985, at 185 million, were 8% greater than the 171 million raised during 1984.

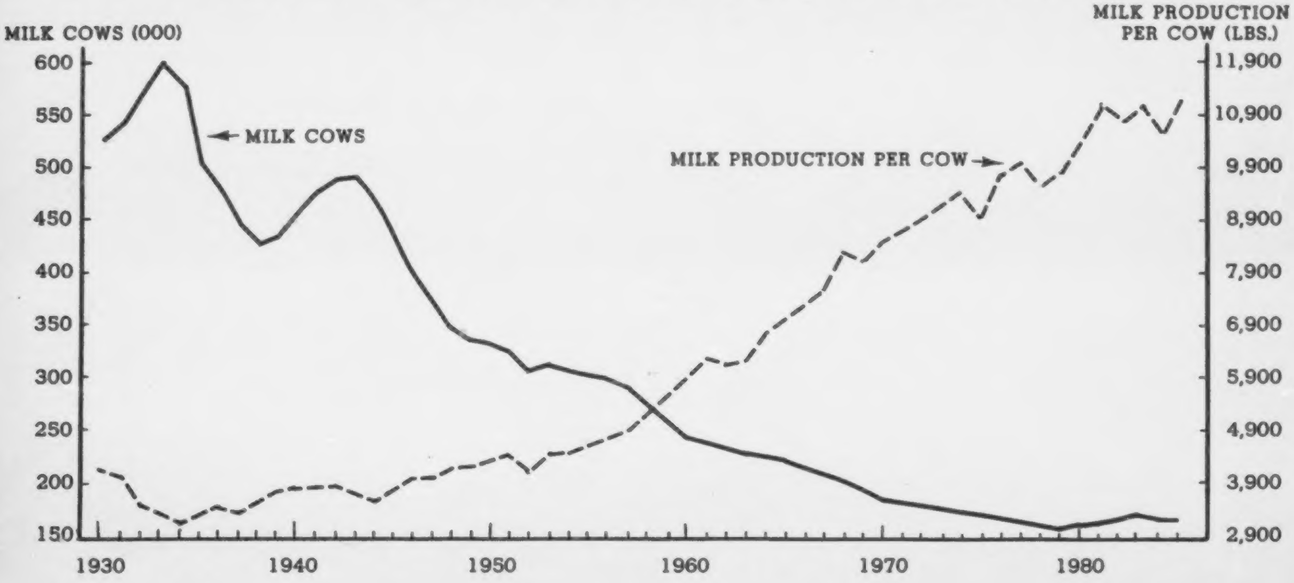
MILK COWS AND MILK PRODUCTION, SOUTH DAKOTA, 1930-1985



INCOME AND PRICES

SOUTH DAKOTA

Income

The preliminary 1985 South Dakota cash receipts from farm marketings, excluding government payments, totaled $2,969 million, an increase of 3% from the $2,889 million in 1984. Sales from all livestock, poultry, and their related products accounted for $1,782 million, or 60% of the 1985 total. Sales from all crops accounted for a record $1,187 million. The 1985 total for all livestock products was down 1% from 1984, but the 1985 cash receipts from all crops was up 9% from 1984.

Including government payments, the total 1984 cash receipts from farm marketings was a record $3,120 million. Livestock marketings accounted for 58% of the total, crop marketings accounted for 35% of the total, while government payments accounted for 7% of the total.

Cattle and calves remained the largest income source in 1984, accounting for 39% of the total. Wheat and hogs were second and third, accounting for 12% and 9% of the total, respectively.

Government payments to South Dakota farmers totaled $231 million in 1984, down 13% from the record payments made in 1983. Payments from the Wheat Program brought in the single largest amount at close to $72 million.

Farm production expenditures during 1984 totaled $2,715 million, up 3% from 1983. The 1984 realized net farm income for the State totaled $623 million, 53% more than in 1983. Realized net income is a measure of the change in farmers' income position, but does not include the value of changes in farm inventory.

Prices

The 1985 season average prices for all crops but hay were down from 1984 levels. Wheat was down 10 cents to $3.36 per bushel. Rye dropped 7 cents to $1.85 per bushel, its lowest level since 1972. Corn and grain sorghum prices dropped 19 and 32 cents to $2.25 and $1.82 per bushel, respectively. Oat prices dropped 42 cents while barley dropped 13 cents. Flaxseed dropped 80 cents, and soybeans fell 52 cents to a season average of $4.95 per bushel. Sunflower prices fell $1.82 per cwt. to $8.18. The all hay season average price showed the only increase from $44.50 to $46.00 per ton.

The 1985 average prices for meat animals were both up and down from 1984. Hog prices fell $3.30 to $43.40 per cwt. The average price for beef dropped $2.90 to $54.90 per cwt. Lamb prices jumped $8.00 per cwt. to $68.50 for the yearly average, and sheep prices rose $7.60 per cwt. to $23.60 for 1985.

UNITED STATES

Income

The 1984 United States cash receipts from farm marketings including government payments totaled 150 billion, an increase of 3% from 1983. Of the 1984 total, 48% resulted from the sales of livestock, poultry, and related products. Crop sales accounted for 46% of the total, with government payments covering the remaining 6%. The five leading states for farm cash receipts in 1984 were California, Texas, Iowa, Nebraska, and Illinois. South Dakota ranked nineteenth in total cash receipts, twenty-third in crops, and sixteenth in livestock receipts. The five leading states for livestock receipts in 1984 were Texas, Iowa, Nebraska, California, and Wisconsin, in that order. The top five states in crop cash receipts were California, Illinois, Iowa, Texas, and Florida. The leading states for individual commodities were Texas for cattle and calves, Iowa for corn, soybeans, and hogs, and Kansas for wheat.

Prices

Nationally, prices received by farmers in 1985 for all major crops were down from 1984. Corn prices dropped 21 cents to $2.41 per bushel, and soybeans fell 62 cents to $5.16 per bushel. Grain sorghum averaged $2.19 per bushel, a decrease of 20 cents from 1984. Barley prices dropped an average of 25 cents per bushel to $2.01. Oat prices plummeted 44 cents to $1.25 per bushel. Wheat and rye prices both fell, 22 and 3 cents, respectively.

The United States 1985 average price for beef cattle at $53.70 per cwt. was down 6% from 1984, while calf prices rose 4% to $62.10 per cwt. The average hog price at $44.00 per cwt. was down 7% from 1984. Lamb prices averaged $67.70 per cwt., up 13% from 1984, and sheep prices at $23.90 per cwt. were up 6%.

1/ SEASON AVERAGE PRICE IS DEFINED AS THE AVERAGE PRICE RECEIVED BY FARMERS DURING THE CROP'S ENTIRE MARKETING YEAR: ROW CROPS RUN FROM OCTOBER 1 - SEPTEMER 30, SMALL GRAINS RUN FROM JULY 1 - JUNE 30 AND SOYBEANS RUN FROM SEPTEMBER 1 - AUGUST 31. 2/ VALUE OF PRODUCTION IS THE PRODUCTION OF A CROP MULTIPLIED BY THE SEASON AVERAGE PRICE WHICH IS RECEIVED FOR THAT PART OF THE CROP THAT IS SOLD. VALUE OF PRODUCTION CANNOT BE TAKEN AS INCOME SINCE THE INCOME FROM THAT PART OF THE CROP WHICH IS FED TO LIVESTOCK IS INCLUDED IN THE INCOME SHOWN FOR LIVESTOCK.
